Rishi Srivastava

Gurugram, India | rishisrivastava201199@gmail.com | 6392517523 | Linkedin | GitHub

Profile

Software Engineer with 2 years of experience building scalable backend systems and AI-powered applications. Proficient in Python, FastAPI, Django, and REST API development, with hands-on experience in RAG-based solutions and LLM integrations. Strong problem-solving skills with expertise in designing high-performance, production-ready software.

Skills

Languages: Python, JavaScript, SQL
Frameworks & Libraries: Django, FastAPI, React.js, LangChain, NumPy, Pandas
AI & Generative AI: GenAI, RAG, Large Language Models, LLaMA, Prompt Engineering, Semantic Search
Databases: MySQL, PostgreSQL, SqlAlchemy, ChromaDB
Tools/Platforms: Git, GitHub, Docker, Linux, JIRA, Postman, Celery, Jupyter Notebook, CI/CD, GitHub Actions, Shell Scripting
Testing: pytest
Operating Systems: Ubuntu, Windows

Professional Experience

AnuBrain Technology — **Noida**
Full-stack developer — *Dec 2025 – Present*

- Developing a centralized GST management platform for CA firms and businesses.
- Building scalable backend modules using Django and interactive frontend interfaces using React.js.
- Implementing GST return handling, document management, and secure file processing features.
- Developing dynamic dashboards and report generation features to simplify GST operations.
- Collaborating on API integration, system architecture, and database optimization for scalability.
- **Tech Stack:** Python, Django, React.js, REST APIs, MySQL, HTML, CSS, Docker

Cogent E Services — **Noida**
Executive Software Engineer — *Dec 2024 – Dec 2025*

- Developed AI-powered voice analytics and document intelligence applications using Django and FastAPI for transcription, summarization, sentiment analysis, and contextual retrieval.
- Integrated Deepgram and Azure AI Speech Services for speech-to-text processing, diarization, and language understanding workflows.
- Implemented LLaMA3.2-powered summarization, contextual search, and natural language querying of structured and unstructured data.
- Built scalable backend APIs, asynchronous workflows, and data pipelines using asyncio and Celery to optimize processing efficiency.
- **Tech Stack:** Python, Django, FastAPI, MySQL, LLaMA3.2, GenAI, RAG, Deepgram, Azure AI Speech, LangChain, ChromaDB, asyncio, Celery

NovoStack — **Noida**
Backend Developer (Internship) — *Dec 2023 – Sept 2024*

- Developed REST APIs using FastAPI & SQLAlchemy for loan management system.
- Built OCR system using PyTesseract for document data extraction.
- Improved backend performance and API structure for better scalability.
- Worked on multiple backend services and API integrations.
- **Tech Stack:** FastAPI, Mysql, HTML, CSS, JavaScript, Bootstrap

Education

Noida Institute of Engineering & Technology (NIET) — **Greater Noida, Uttar Pradesh**
Bachelor of Technology (B.Tech), Computer Science and Engineering | CGPA: 7.6/10 — 2019 – 2023
